EPA Request for Addn'l Work 1.15.15.pdf

Ben,

People here are enthusiastic about this testing!

Jay

What really interests me about this letter is the last part, "GCPT Phase I Corings". EPA is actually going to simulate an SSE on the core samples and measure the effects! We always talked and asked about this with Dan Gravatt, but...?

This may be Brad Vann's decision. When I met with Brad at Bread Co, we talked about our CBR backgrounds in the military. He also has some good practical work experience with USACE and FUSRAP, especially Weldon Springs, so he may be bringing some good thinking to Region 7.

I see this as a good move!

I would also like to see the ground water injected for tracer testing.

Jay
